

ABSTRACT

RECOVERING MANAGEMENT IN A COMMUNICATION UNIT TERMINAL

A communication unit with a recovering management terminal for handling deleted items, and having means to recover and re-install deleted items in their original location. In communications units there has long been a need for better handling of deleted items as well as easier procedures for deleting items. With the claimed invention a user of a communication unit will easily delete items of any kind without the need for numerous confirmations to make certain the user really wants to delete the selected item. If the user should unintentionally delete an item or later regrets a deletion he/she can with the claimed recovering management terminal recover and re-install the item in its original location.
